Job Location	Job Type	Point of Origin
Takoradi/Offshore	Permanent/Rotational	Local/Regional/Expat

### Job description

#### Marine Superintendent

Alliance Drilling is recruiting personnel for the position of Marine Superintendent for our Client in the Oil and Gas sector.

The role will report directly to the Offshore Installation Manager. The individual should have experience within FPSO operation environments and worked in a senior marine capacity previously. The candidate will have experience of managing teams and acting as a focal point between offshore, onshore and 3<sup>rd</sup> party suppliers.

This position is on a permanent and rotational basis.

#### Responsibilities/ Key Objectives

- Acting as a mentor/trainer/shadow to local partners to facilitate the eventual localization of the operations. Where required this will be a KPI with an agreed program set out by the management team
- Support Marine Engineering Requirements required for daily O & M Operations and Engineering/MoC requirements.
- Actively manages and is accountable for ABS / DNV and planning processes
- Responsible (and Focal Point) for input and follow-up for O&M co-ordination to offshore plans with assistance from other business units of the client. Continual monitoring and input to offshore to ensure activities are in full compliance.
- Interface with Offshore Planners.
- Keeping abreast with industry developments with regards to operational inspection and maintenance of FPSO structures and realization of potential benefits to operations at the appropriate stage of technique maturity.
- Participate in annual review, audits of and provide assessment of the Operations Management System.
- Ensuring that any non-compliance with the FMS / OMS is identified and addressed.
- Ensure that Client's policies are known, understood and adhered to.
- Fulfill risk management support requirements by ensuring all risks in process systems, associated utilities and operations / maintenance tasks are identified and processes are established and implemented in line with the requirements of the Safety Case.
- Communication of investigation results to the management team at the appropriate level.
- Perform walkthroughs and ensure on & offshore compliance by means of inspection, verification, and audit of their

allocated areas of responsibility.

- Audits of third-party inspection contractors and rectification of identified deficiencies

### **Safety and Environmental Critical Activities**

- Complies with the Client's HSEQ Code of Conduct as described in the HSEQ Policies, Standards, and the Procedures to protect people and the environment at all times.
- Has a duty of care to ensure that all personnel work in a manner that is not harmful to their own health and safety and the health and safety of others.
- Complies with the Client's Policy Code of Business Conduct and Ethics and expected training at all times.
- Lifting equipment and operations
- Shuttle Tanker mooring/unmooring operations
- Stability and cargo load distribution and hull stress management
- Area authority for Permit to Work; Department Head for marine designated areas
- Vessel movements
- To motivate, consult and ensure participation of employees and contractors in the management of safety.
- To propose and maintain KPIs within their areas of expertise and to be accountable for their own (and their trainees) KPI performance, verification and input with their own KPI's into Monthly Report.
- Management of Change, implementation of small MOC's: working with offshore opposite numbers to develop recommendations, produce/documents/deliverables, gain approvals, produce work-packs (with coordinators) implement, close-out MOC's that are less than 90 day duration from approval to execution close-out.
- For large MOC's greater than 90 days of duration: Provide support, assistance and co-ordination (with offshore and Project Team) within your discipline to internal or external and other contractors.
- Assistance within area of expertise to provide guidance to tender specification development, sourcing, purchasing review and assistance with expediting where necessary.
- Monitor and Ensure operational and maintenance compliance within their discipline, recommend improvements and efficiencies for management approval.
- To review all associated inspection reports against the contract requirements and ensure that all maintenance recommendations deliver compliance with that contract.
- To participate in integrity review meetings to ensure anomaly management is executed as appropriate against the associated risk of the anomalies.
- To review inspection reports collectively at a high level to identify any patterns that may indicate future problems.
- Implementation of advance analysis as required, either by incumbent and/or specialist subcontractors. To address complex anomalies.

- Provide assistance to Lead Investigators for incidents associated within their area of expertise, participate or perform RCA's inside of those investigations.

#### **Skills and Experience:**

- Extensive experience industry experience preferably within the FPSO operations environment of which 5 years' experience in senior marine capacity in Offshore Operations and /or minimum of 5 years' experience as chief officer on Tankers or FPSO experience
- Strong personal and interpersonal skills, culturally aware with experience of working with a multicultural workforce.
- Track record of analysis capability and experience covering typical ships structures in the fields of strength, fatigue and rule assessments.
- Working knowledge of the ship classification process and the associated statutory survey requirements.
- Marine Engineering or Marine Architect experience with Tanker/FPSO inspection and repair knowledge.
- Experience of in-service repair activities.
- Proven capability and experience in leadership and management of third-party contactors and junior team members.

#### **Desired Experience & Education**

- A Bachelor's Degree in Marine Engineering OR an equivalent Tertiary Level Education
- Class I certificate of competency with Dangerous Cargo Endorsement or an equivalent demonstration of competency
