Job description

Offshore Installations Manager (OIM)

Alliance Drilling is recruiting personnel for the position of OIM for our Client in the Oil and Gas sector in Ghana.

This role will report directly to the Operations Manager. The individual will be responsible for the safe running of operations offshore and should have strong leadership skills in order to effectively communicate with the team.

This position is on a permanent and rotational basis.

Responsibilities/ Key Objectives

- Co-ordinates and leads the Client's operations and maintenance teams on the FPSO
- Provides a safe, efficient and cost-effective operation.
- Ensures that the Operations Management System (OMS), is implemented and maintained onboard the FPSO.
- Ensures that any non-compliance with the OMS is identified and addressed.
- Participates in annual review and provide assessment of the Operations Management System.
- Motivates, engages, and ensures participation of employees and contractors in the management of safety.
- Ensures that Client's policies are known, understood and adhered to.
- Ensures all personnel who perform work on the FPSO are made aware of their responsibilities for managing health, safety, emergency response and compliance with the Operations Management System.
- Assists in the preparation of budgets and in the planning and co-ordination of campaign maintenance, conversions, or other major activities
- Oversees all activities and operations ensuring they are performed in accordance with the applicable procedures, that all relevant safety codes and regulations are followed and that simultaneous operations with high-risk potential are managed in accordance with the Operations Management System.
- Evaluates simultaneous operations and their impact on the integrity of the facilities ensuring procedures are in place to action and respond to any situation.
- Ensures familiarity with all limitations to the technical integrity of the facilities and with the inspection activities required.
- Fulfils risk management requirements by ensuring all risks in process systems, associated utilities and

operations/maintenance tasks are identified and processes are established and implemented in line with the requirements and guidelines of the Jubilee development Safety Case.

- Manages implementation of engineering changes through the Management of Change procedure.
- Manages, controls, approves and monitors the Permit to Work system.
- Ensures full co-operation between all departments and personnel on the FPSO to ensure the safety of the facilities and efficient performance of all tasks.
- Ensures that lines of reporting or communication onboard are adhered to and that any changes in the onboard organization are reflected in a coordinated organization plan.
- Ensures, in conjunction with department heads, that appraisals of all personnel are conducted on a regular basis, training needs are analyzed, and training requirements fulfilled where considered necessary.
- Develops the facility's annual plans and objectives, encompassing EHS, operations, technical integrity/maintenance, training and human resources to support and ensure the achievement of the facility's annual plans and objectives.
- Ensures Succession Plans are in place in co-ordination with Human Resource Manager and Operations Manager.
- Ensures a good working relationship with all internal and external stakeholders

HSEQ

- Complies with the EHS Code of Conduct Policy and Procedures to always protect people and the environment. Has a duty of care to ensure that all personnel work in a manner that is not harmful to their own health and safety and the health and safety of others.

Compliance

- Always complies with Client's Code of Conduct and Business Ethics policies and training.
- Ensures that the operations policy is managed in accordance with the business plan for continued development of an operations plan appropriate for the facility
- Supports the Operations Manager in the management of operational and maintenance budget, prepares cost estimates as required, controls costs and oversees the operation of the purchasing system
- Manages the human resources available to develop and maintain an integrated and effective work culture where all employees and contractors strive to achieve business goals
- Demonstrates visible leadership within changing working arrangements as required by the business by employing good communication skills, self-motivation and a proactive approach
